Digital Safety for Sexual Assault Survivors

*Prepared for the OCRCC
By Paula Wansbrough
May 27, 2021*

Agenda

What digital abuse is

- Frequency
- Tactics
- Impact

What to do about it

- Safety planning
- What to do when abuse happens
- Strategies for advocates and organizations
- Resources

Trigger
warning!

Keep in mind

Everything that's done digitally creates a record

Survivors of gender-based violence have the right to use technology

Before responding to digital abuse, safety plan

Poll

In the last year, how often have you seen/heard/experienced gender-based digital violence -- in your personal life, work/school life, and beyond?

Women

- Abusive relationships: 81% of abusers said they used tech to harass partner (2017)
- Activism/politics/job: 73% women journalists, especially if racialized or LGBTQ2S (2020)
- All women report increased intensity of online violence from 2017 (2021)

LGBTQ2S

- 7/10 adults harassed online (2021)
- 1/2 youth bullied online (2019)

A vertical bar on the left side of the slide, consisting of a light gray upper portion and a dark gray lower portion.

Poll

What are digital safety concerns for sexual assault support seekers?

Non-consensual distribution of images

Rape images

- Sharing images of sexual violence

Sextortion

- Threatening to share image with others if not paid/provided with more

“Revenge
porn”

- Sharing image with others to get back at person - person may have originally consented

Deep/shallow
fakes & nudes

- Videos & photos of sexualized content into which a woman’s image is inserted

Creepshots

- Taking exploitive photos of women in public

Unsolicited
images

- Dating apps: 1/2 women receive explicit images

Cyberbullying

Trolling

- Deliberately baits a person with intent to provoke a reaction/cause harm

Doxing

- Seeking & distributing info about a person with intent to cause harm

Cybermob

- A group targets an individual

Zoom bombing

- Crashes video-conference to make/post offensive comments/images

Cyberstalking

Repeated
messages

Device/account
history

Hacking

Spyware

INTIMATE PARTNER ABUSE	
CHART	IDENTIFYING TECHNOLOGY ABUSE
<p>Technology abuse is serious, and threats made online or in texts are real. Use this chart to think about how your ex-partner is using technology in his efforts to control and intimidate you. Then consider which strategies you need to use to keep you and your children safe and how much outside help (technical expertise, police) you may need. Keeping a record of this information is also helpful as evidence of abuse for your family law case. Learn more in the "Evidence" section.</p>	
UNWANTED COMMUNICATION	DETAILS (DATES, NUMBER OF TIMES, CONTENT, ETC.)

Questions?

**What can you do about
digital abuse?**

A vertical bar on the left side of the slide, consisting of a light gray upper portion and a dark gray lower portion.

Poll

What are the 3 important things to keep in mind about digital safety?

Remember

Everything that's done digitally creates a record

Survivors of gender-based violence have the right to use technology

Before responding to digital abuse, safety plan

Personalized tech safety plan

Survivor leads

- Knows what's happening
- Digital priorities

If there's kids, include them

- Kids' tech use can make her vulnerable
- Ex-partner will involve them

SecurityPlanner.ConsumerReports.org

Safety apps

Pros

- Can be very empowering
- Handy
- Integrating safety into tech

Cons

- Who's behind it?
- Where is the data kept? What laws govern it? Who has access?
- What happens if abuser accesses it?
- Is it up-to-date?

MyPlanApp.ca

Top 5 safety to-do's (for everyone)

Use a safer device if possible

Lock your device (avoid bio locks)

Manage passwords (e.g. LastPass)

Use, update & monitor privacy settings

Log out of accounts

The importance of community

Removing images

NeedHelpNow.ca

- For youth but info is applicable to anyone
- Quarterly updates

CyberCivilRights.org/online-removal

- For adults
- More platforms

Before removal: Document it (screen shot)

Online attacks

Platforms vary in how they respond

- Some have help centres
- Response will likely be slow

Resources

- [TechSafety.org](https://techsafety.org)
- You are not alone: Ashley Judd's Ted Talk

Before removal: Document it (screen shot)

The law

All digital activity leaves a record, which may be used as evidence

Some digital abuse is against the law

Criminal: stalking, threats, minor

Civil: sue for damages

Family: restraining & parenting orders

Poll

What is your biggest concern about managing digital safety?

Staying on top of tech

Volunteer local tech experts, e.g. phone companies, schools

Savvy staff/volunteers or assign specific tech topics

Support seeker's personal network

Where she bought her phone, computer

Share knowledge & resources

When looking at resources

Digital safety at every service stage

Outreach:
tech safety
info on
site, tips in
social
media

Intake: ask
every
support
seeker
about
digital
abuse

Cover tech
use in
safety
planning

Host safe
virtual
meetings

Digital
safety
services:
Safe
Support
Chat,
refurbished
phones

Safe Support Chat

Start a new chat

Chat has end to end encryption

- No IP address captured by app
- If organization chooses to keep a transcript the other party cannot be identified
- Most orgs aren't keeping transcripts
- No record left on person's browser

Text not as secure: user gets notification

Safe video conferencing

Invitation only,
if possible

Set the meeting
to have a
passcode

Use the waiting
room, admit only
people who
identify themselves

Think about what's
in your background

"Faces not
boxes"

Emergency
signal

Women's Foundation

1. Palm to camera and tuck thumb

2. Trap thumb

Organizational infrastructure

Record keeping

- Privacy & digital safety

Policies for support seekers

- Managing tracking devices

Policies for staff/volunteers

- Photos/names on site, social media
- Use of own devices
- Social media guidelines

Network safety

- Computer access - connection with org's server
- Protect org wifi

Thank you!
